One of the activities organised for Architecture Week, which aims to underline the value for people of architecture in general and everyday urban architecture in particular, is the film and architecture cycle entitled **?Barcelona on Film?.**

This cycle, which will be screened in all the city?s districts, includes a series of films in which our city is the backdrop of some of its scenes, inviting cinemagoers to think about the role of the urban environment as an essential element of our everyday lives.

In each district you will be able to watch these stories that were once filmed in or have a strong relationship with that neighbourhood.
