The Centre for Architectural Rehabilitation of Barcelona (OBRA) takes part in the **2014 Denkmal Fair for Conservation, Restoration and Old Building Renovation**, held on November the 6th, 7th and 8th in Leipzig (Germany) and dedicated, this year, to historical facades.

The Architects's Association of Catalonia, an OBRA member, will be exhibiting the rehabilitation projects participating in the '[Mostra d'Arquitectura de Barcelona \[2\]](#)', along with the rehabilitation project for the facade of our headquarters, and the AADIPA European Prize for Intervention on Architectural Heritage.

The stand will also showcase the restoration of the Sant Pau Hospital in Barcelona and the restoration of Barcelona's Ciutat Vella.

Denkmal is the benchmark fair in the field of renovation and restoration of architectural heritage. The fair is experiencing a period of expansion, with strong influence in Central and Northern Europe, Eastern Europe and Russia.
